Business Area Consulting

CONSULTING

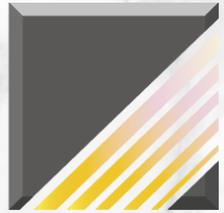

Consulting

We have a long-term expertise in the industrial area and have successfully completed numerous projects.

Our portfolio includes:

- Project management
- Logistics
- Production
- Quality
- Controlling
- Interim management (CEO, COO, CTO, Project Leadership)
- Construction management

Project Management

Our well-experienced team gladly undertake the project leadership or your entire project including the project handling.

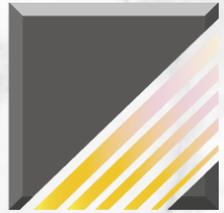

We offer support in the following areas:

- Logistics
- Production
- Quality
- Technics
- Development, R&D
- Relocation of factories
- Finances

Logistics

- Warehouse planning incl. design and layout
- Planning of logistical processes
- Support in choosing the right kind of warehouse system
- Design of shelves
- Value stream mapping
- Design of floor-level transportation systems
- (public) tendering
- Lean management (5 S...)
- Cargo tendering
- Packaging planning
- Procurement of series-manufactured and project material
- Logistics controlling
- Supply chain management
- Fleet management
- Trainings / instructions

Production

- Layout planning
- Process and sequence planning
- Production planning
- Design and optimization of assembly lines
- Support in choosing the production processes in different areas (injection material, metal processing, assembly)
- Time calculation (MTM)
- Construction und delivery of assembly lines with transportation systems

Quality

- Quality planning
- Supplier audits
- ISO 9001
- TS 16949
- Support during development process
- Quality tools
 - FMEA
 - 8D-Report
 - Initial sampling (PPAP)
 - Control plans

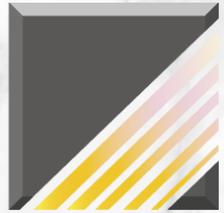

Controlling

- Project controlling
- Cost centre controlling
- Budgeting
- Reporting
- KPI's
- Logistics controlling
- Investment budgeting
- Due diligence
- Material handling
- Balance sheet analysis

Construction management

- Layout and planning of Buildings
- Construction supervision
- Construction coordination
- Tendering and negotiations
- Energy systems
- Independent consulting
- Facility management
- Consultation for
 - Purchase
 - Sale
 - Leasing

Phase 1: Survey

- Status Quo
- Documentation of current working processes
- Time- and videorecording and -analysis

Phase 2: Depiction

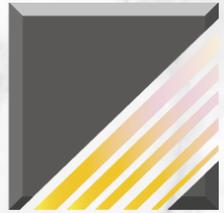

- Losses
 - Quality, process, down-time
- Methods
 - MTM-Analysis, data evaluation (quality, production)

Phase 3: Analysis of losses

- Methods
 - 5-Why, Fishbone, Ishikawa

Phase 4: Action-Plan

- Preparation and implementation of action plan
- PDCA-Method

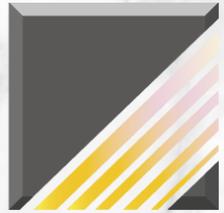

DI (FH) STEFAN DIETRICH

Education

- GCE A-Levels
- Master's degree in production technology and management techniques
- Multiple trainings in management and project management

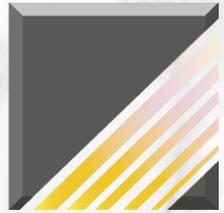

DI (FH) STEFAN DIETRICH

Experience

- Long-term experience in industrial area in Austria and abroad, with focus on automotive suppliers and vehicle manufactures
- Manager, COO, project manager, production manager, purchasing manager
- IT logistics, construction management, development, fleet management, relocation

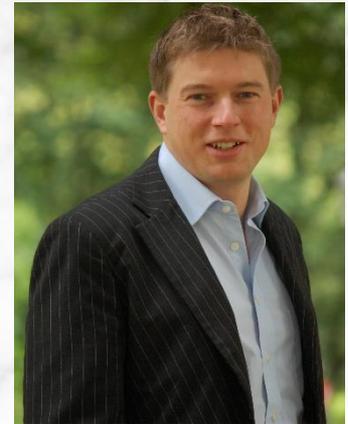

DI (FH) HERBERT GÖSWEINER

Education

- GCE A-Levels
- Courses in engineering
- Master's degree in industrial engineering in Hamburg

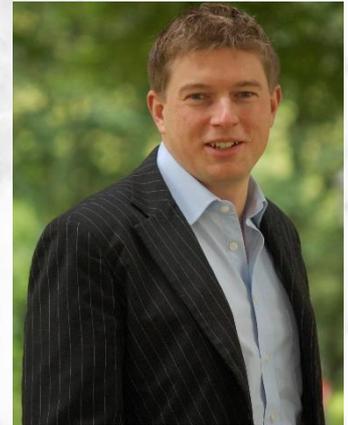

DI (FH) HERBERT GÖSWEINER

Experience

- Long-term experience in industrial area in Austria and abroad, with focus on automotive suppliers
- Technical director, project management, research, development
- Die-casting (TCG-Unitech), injection, metal processing, quality control

Mag. MARTINA DIETRICH

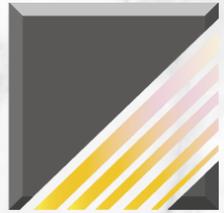

Education

- GCE A-Levels
- Master's degree in economics with focus on controlling and accounting

Experience

- Long-term experience in industrial area (automotive and paper industry)
- Project controlling, area controlling, R&D controlling, sales controlling, accounting (balance sheet), M&A projects, project purchasing, funding

MARKUS KEPPERT

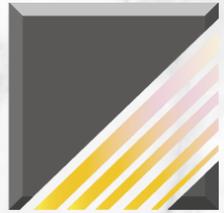

Education

- Trained manufacturing engineer
- Courses in Industrial Engineering

Experience

- long-term experience in industrial area (automotive industry, medical sector)
- Planning of assembly lines, calculations, development (focus on injection moulding)

CARLO ZAMBELLI

Education

- Trained manufacturing engineer
- Courses in Industrial Engineering
- Master's degree in Process Management

Experience

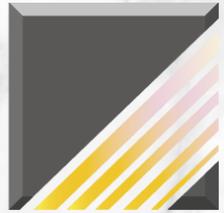

- long-term experience in industrial area (automotive industry, renewable energy)
- Planning of assembly lines, calculations, development (focus on MTM-technology)

TEAM

- Our team also consist of two junior project managers with BA / MA degrees and experience in project management and handling
